

RETRACTING LANYARD

Retracting lanyards or Mini Blocks, are ideal for many fall arrest applications where the anchor point is within 2.5m of an exposed edge or there is a need to reduce fall distances.

The Mini Blocks act as a miniature inertia device and lock immediately in the event of a fall, reducing both fall distance and forces.

The Mini Block is ideal for remote site operations due to its unique sealed inner housing. This means that the Mini Block does not need to be sent to a service agent for inspection. An inspection by a competent Height Safety Equipment Inspector is all that is necessary.

KEY FEATURES

- Locks off immediately in the event of a fall, reducing the forces generated on the user's body as free fall distance is reduced
- Light weight sealed inner housing and non-corrosive inner mechanisms means the Mini Block does not need to be pulled apart and serviced.
- 10 Year shelf life / 5 year working life
- 2.5m working length

APPLICATIONS

- Working at heights
- Limited free fall

Code: RL1, RL1SS

MATERIALS & CONSTRUCTION

- 46mm Supertape
- Flourescent Yellow webbing
- Lightweight plastic sealed housing
- Carbon Steel Nickel Plated Triple Action Karabiners (K1) at both ends
- Weight 1.2kg

SAFE WORKING LOAD (SWL) - Maximum combined weight including tools shall be no more than 120kg
