RE-STOCK

We understand that refilling and restocking your first aid supplies can be a hassle. That's why we have created an easy online re-stock option for small to large scale businesses.

Simply order a full kit re-stock and we will ship your supplies to your door for you to put into your organised and labelled Trade Aid Kit!

Trade Aid Kits provide you with a high quality and purpose built first aid kit that gives every tradie the opportunity to work safely, wherever that might be.

You will get:

- A high quality bag that doesn't fall apart on you.
- Zips and seams that are weatherproof.
- A highly organised first aid kit that you can quickly find what you are looking for inside and easily see what you're running out of.

You will be able to:

- 100% deduct your Trade Aid Kit at tax time
- Purchase a First Aid Kit that is developed in line with the W.H.S code of practice.
- Easily store first aid in your vehicle or workplace
- Access first aid supplies (such as a tourniquet) that can make the difference in an emergency.

THE DIFFERENCE

Most first aid kits consist of a range of similar products. We have developed ours in line with the WHS code of practice and have also included some heavy-duty items for you that you won't find in one kit anywhere else.

- Tourniquet
- Snake Bite Bandage
- CPR Kit
- Eye Cup
- Fever Scan strip
- Large (tradie) size Band-aids

+ All the standard first aid kit items except ours are high quality, easy to find and easy to replace.

BUILT TO LAST

Our Trade Aid Kit is built to last.

- The material is a high-quality Oxford 600D Polyester and the external zips are heavy-duty with welded weatherproof seals to keep dust and dirt out.
- The Kit itself is compact in size and almost 1/3rd smaller than the average comparison first aid kit so that you can fit into a toolbox, under your car seat!
- The innovative molle system on the back of the kit allows you to hang or clip the kit so that you're given the best chance of keeping it within arms reach.
